

## Information: Elementary Electricity, Motor Car Electric Systems and Delco Light (Classic Reprint)

Filesize: 4.09 MB

### ***Reviews***

*This published publication is fantastic. it had been writtern very perfectly and useful. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

***(Junius Herman)***

## INFORMATION: ELEMENTARY ELECTRICITY, MOTOR CAR ELECTRIC SYSTEMS AND DELCO LIGHT (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Information: Elementary Electricity, Motor Car Electric Systems and Delco Light In a similar way we may say that electricity exists in a state of no pressure, but we can give to it a pressure by means of a generator, and when we allow the electricity to escape, as we may term it, it gives up its pressure, then it is, like water, giving up energy and doing work. The amount of work that can be done depends upon the pressure and the rate current flows. We know that electricity is invisible, yet there is pressure behind it in one state and it flows under this pressure. We cannot measure the rate of flow in gallons per hour as we do in a water system; instead, we measure the rate it flows in amperes. We have said that electricity to flow must have pressure behind it to cause it to flow. In a water system water flows under a certain number of pounds pressure. In an electric system current flows under a certain number of volts pressure. When a wire or any substance is used to transmit current from one place to another it is called a conductor. These conductors offer a resistance to the flow of an electric current therefore, we must have some means of measuring this resistance. The resistance offered to the flow of current depends upon the kind of metal used as a conductor, its area and length. The three terms just mentioned - the volt as the unit of electric pressure, the ampere as the unit of electric current and the ohm as the unit of electric resistance are related to...
