

Foundations of Naturopathic Nutrition

By Paxton, Fay

Allen & Unwin, 2015. Paperback. Book Condition: New. 19 x 25.5 cm. Nutrition is a vital part of the complementary approach to health. This uniquely comprehensive and evidence-based text provides a detailed and systematic guide to the principles of clinical nutrition from a naturopathic perspective. The text begins with an overview of basic physiological principles and the body's protective systems, such as the antioxidant, detoxification and immune systems. The focus then moves to an in-depth examination of food components, including essential nutrients, such as protein, lipids, carbohydrates, vitamins, minerals and trace elements, as well as nutritional bioactives, such as coenzyme Q10, alpha-lipoic acid, phytochemicals, digestive enzymes and probiotics. There is detailed information on how each food component is digested and metabolised in the body, and guidance on its impact on health, including an explanation of the effects of inadequate and excessive intake. The types of supplements available together with dietary sources are also explored. Discussions of important nutritional topics are featured - for example, water as therapy, obesity, anorexia nervosa, high-protein diets, hypoglycaemia, diabetes, phytosterols, gamma-tocopherol, vitamin E and mortality, vitamin C and cancer, infantile scurvy, acid-forming and alkaline-forming diets, hair analysis, sodium and blood pressure, and coenzyme Q10 and cancer. Summary...
