Mittal Publications, New Delhi, 1990. N.A. Book Condition: New. Xii+219pp There are currently as many CBA (Cost Benefit Analysis) methodologies as there are CBA gurus. The chief aim of the present book is to guide the students of project appraisal as much as the practical project planner to a simple integrated framework and a practical calculus based on the socio-economic realities of the third world. Thus while those looking for a logical explanation of CBA concepts will find enough fare by way of theoretical underpinnings of the new discipline, it is the project analyst, the engineer, the finance manager, the development administrator, the economist concerned with micro-level investment planning and the students, pursuing a semester level course in universities and management training institutions who will find the book a practical vade mecum.
