Many variables must be considered when negotiating especially on a global scale. Understanding important factors assist in developing and following negotiation strategies across cultures and ethnic differences. Effective use of various techniques and concepts increases the probability of an organization reach a successful conclusion to global negotiations. Failure to adhere to these certain procedures can result in failed negotiations. This paper will review how an organization headquartered in the United States will negotiate with a potential supplier in India on a major purchase of key components used in manufacturing the United States organization's product. In evaluating this negotiation process several concepts will be addressed: the cultural and ethnic makeup of each country will be introduced, cultural and ethnic differences between the two countries, determination of the correct negotiation tactic, and how the negotiation will be conducted to reach the desired objective. 12 pp. Englisch.
