

Bulletin of the Southern California Academy of Sciences Volume 18-21

By Southern California Sciences

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 138 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919 edition. Excerpt: . . . determine whether or not the balloon is rising or falling. If a tissue sheet falls, the balloon is rising; if it rises, the balloon is descending. It is not possible to tell by the eye or other sensation whether one is rising or falling as there is no sensation except that of motionless suspension. I The statoscope, altimeter, and barographs are instruments showing the rate of ascent or descent, and, in the case of the barograph an ink record is made of every portion of the journey. As the mass of gas in the balloon is very susceptible to heat and cold, a delicate thermometer, or better yet, a finely adjusted thermograph, is necessary to anticipate temperature changes. On the outside of the basket are hung canvas water bottles, life preservers, and a heavy anchor attached to about a hundred feet of rope. In...
