Aviation Supplies & Academics Inc. Paperback. Book Condition: new. BRAND NEW, Risk Management Handbook: FAA-H-8083-2, Federal Aviation Administration (FAA), Aviation Supplies & Academics (ASA), This FAA handbook (FAA-H-8083-2, effective 2009) provides tools to help pilots determine and assess each situation for the safest possible flight with the least amount of risk. Pilots who practice effective risk management possess predetermined personal standards and have formed habit patterns and checklists to incorporate them. This handbook presents methods pilots can use to manage the workloads associated with each phase of flight, resulting in a safer, more enjoyable and less stressful experience for both themselves and their passengers. In the last 20 years, approximately 85 percent of aviation accidents have been caused by "pilot error" -- often the result of a tendency in flight training to focus solely on the physical aspects of flying the aircraft. The flight instructor who integrates risk management into flight training teaches aspiring pilots how to be more aware of potential risks in flying, clearly identify those risks, and manage them successfully -- leading to a solid understanding of how to avoid the most common pilot errors. This comprehensive manual covers subjects such as human behavior, identifying and mitigating risk, aeronautical decision-making, single-pilot resource management, automation, and risk management training. Appendices contain checklists and scenarios to aid in setting personal minimums, sample risk management scenarios, and a controlled flight into terrain (CFIT) checklist.
