Excerpt: . glass fruit ridges, in small confined gardens, to be careful as to ventilation. A single row of bricks, with apertures of four inches, will not be enough; there should be two rows of bricks, one over the other, and consequently two rows of apertures. Peach, nectarine, and apricot trees should be planted twenty-one feet apart; but they grow rapidly, and would probably require occasional removing. It will thus be seen that to commence glass fruit ridge culture, three seven-feet lengths should be prepared, and in the centre of the twenty-one feet occupied by the ridge, two peach or nectarine trees may be planted. They will soon form lateral cordons of great fertility, will require pinching weekly, and give constant employment to the amateur. I must not omit to state the great advantage this mode of fruit culture gives as to protection from spring...
