OUR MISSION TO PLANET EARTH: A GUIDE TO TEACHING EARTH SYSTEM SCIENCE

To get **Our Mission to Planet Earth: A Guide to Teaching Earth System Science** eBook, remember to access the hyperlink below and save the ebook or get access to other information which are related to OUR MISSION TO PLANET EARTH: A GUIDE TO TEACHING EARTH SYSTEM SCIENCE ebook.

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 48 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Volcanic eruptions, hurricanes, floods, and El Nino are naturally occurring events over which humans have no control. But can human activities cause additional environmental change Can scientists predict the global impacts of increased levels of pollutants in the atmosphere Will the planet warm because increased levels of greenhouse gases, produced by the burning of fossil fuels, trap heat and prevent it from being radiated back into space Will the polar ice cap melt, causing massive coastal flooding Have humans initiated wholesale climatic change These are difficult questions, with grave implications. Predicting global change and understanding the relationships among earths components have increased in priority for the nation. The National Aeronautics and Space Administration (NASA), along with many other government agencies, has initiated long-term studies of earths atmosphere, oceans, and land masses using observations from satellite, balloon, and aircraft-borne instruments. NASA calls its research program Mission to Planet Earth. Because NASA can place scientific instruments far above earths surface, the program allows scientists to explore earths components and their interactions on a global scale. This item ships from La Vergne, TN. Paperback.
