CABI Publishing. Paperback. Book Condition: new. BRAND NEW, Tropical Root and Tuber Crops: Cassava, Sweet Potato, Yams and Aroids, Vincent Lebot, Most of the world's poorest smallholders depend on tropical roots and tuber crops as their principal source of food and nutrition. These species produce large quantities of dietary energy and have stable yields under difficult environmental conditions. The most important crops are cassava, sweet potato, yam and the aroids, sharing important common traits such as bulkiness, post-harvest perishability and vegetative propagation. This book compiles the most up to date information on the origin, genetics, physiology, agronomy, pests and diseases and post harvest processing of these crops, while providing ideas for further research and development.
